North Sydney Council

Much of the cost of planting a new tree is to cover sufficient watering for the first couple of years. Consider Cumulative and Ecosystem Level Impacts Sharing information on climate impacts to trees and forests and ensuring species diversity and resilience is important.

Tree Planting & Maintenance Policy

Perhaps BS:5837 should be updated to require this to be recorded in the AIA. Figures available for tree planting on streets show that 608 street trees were planted between 2013 and 2018, an average of 122 per annum We are happy to provide the reports and data upon which this table is based on request.

Bristol Tree Forum blog

Perhaps urban trees are now the poor country cousin? Here is a of this blog.

North Sydney Council

Due to COVID-19 restrictions and delays in government funding, there has been postponements and cancellations of many major tree planting projects.

Programs for Public Trees

This should always balance risk with the benefits the tree provides.

Programs for Public Trees

Over 400 objections to this development were submitted, mostly citing the loss of trees, air pollution, noise and flooding issues. Some of these are not easy to track but when part of the highways savings morphed into reduction of the maintenance of our street trees by 78% the immediate effects were plain and stark. This table is based on the methodology adopted for calculating the Root Protection Area RPA that must be set aside protected during the development of sites where trees are growing or likely to be affected.
