Agent Orange Exposure Claims

Older maternal age is associated with several birth defects, most notably Down's syndrome. As noted for other end points, the veteran studies were generally limited by inadequate sample size, the marginal magnitude of the increased risk, and the failure to exclude bias and chance. The assessment of human exposure continues to be a key element in addressing two of the charges that guide the work of this committee.

38 U.S. Code § 1116

In general, interview responses were not predictive for the presence of a defect for either veteran group. Less than the full 220 gallons of Agent Purple were sprayed on a target north of Route 15, adjacent to a swath, which a VNAF C-47 had sprayed with pink on December 29, 1961. Monthly Vital Statistics Report 41:41-42.
