Hearing loss in children: Everything you need to know

If the hearing loss is conductive, the sound will be heard best in the affected ear. In these patients, cerumen should be removed when it limits examination. Isolated myringosclerosis of the tympanic membrane rarely causes significant conductive hearing loss.

Hearing loss

Neurocognitive and behavioral impact of sleep disordered breathing in children. Coppin R, Wicke D, Little P. Full Hearing Test All children who do not pass a hearing screening should have a full hearing test.

Diagnosis and Management of ADHD in Children

Institute of Educational Sciences: What Works Clearing House, U. Practice parameter: Evaluation of the child with global developmental delay: Report of the Quality Standards Subcommittee of the American Academy of Neurology and the Practice Committee of the Child Neurology Society. Rarely, perilymph fistulas and acoustic neuromas are implicated.
