The Political Economy of Populism: An Empirical Investigation

There are several solutions to this question.

How Should Christians View Politics?

Raman 1888—1970 , a Nobel Prize winner in physics, and Satyendra Nath Bose 1894—1974 , a theoretical physicist who described the behavior of photons statistically, and who gave his name to bosons. Many will line up behind one party or another, based on self interest or the perceived general welfare of the country.

How should a Christian view politics?

Q: A last question: What do you see on the horizon, politically speaking? For example, Kelly Clark 2014 argues that we can only sensibly inquire into the relationship between a widely accepted claim of science such as quantum mechanics or findings in neuroscience and a specific claim of a particular religion such as Islamic understandings of divine providence or Buddhist views of the no-self. Socialism: An economic and sociologic analysis.

Religion, liberty and economic development: An empirical investigation

This was especially true of the first-century believers who, under merciless political regimes, sustained their faith under immense cultural stress. Our Christian mandate is to spread the gospel of Christ and to preach against the sins of our time.
