There were several other cabinet members thrown in but they all ultimately got short shrift compared to Perkins. Indeed, he garnered a good amount of Republican support, initially, for his policies.

The first chapter of the book is set aside to lay some historical background; Cohen criticizes the Hoover administration for their lackadaisical outlooks on the economics of the country.

Cohen makes the case that she was, it's just there are probably about 2 million other biographies I'd choose to read first. Cohen shares stories of triumph and failure while sharing how personal ties to various issues in the past had shaped the policies of the New Deal, and how it dictated how the cabinet members interacted with one another. The book speaks to their character, their experiences and how their lives had shaped them into individuals that Franklin Roosevelt could use to orchestrate his ambitious agenda. As unemployment figures rise and major industries demand government bailouts, the historical comparison looks more and more plausible. But after creating the New Deal and literally being the crutch of the American people, I would say he was one of my favorite presidents in history.

Nothing to Fear: FDR's Inner Circle and the Hundred Days that Created Modern America

Nothing to Fear: Adam Cohen on “FDR’s Inner Circle and the Hundred Days that Created Modern America”

As a reader it really pulls you in and makes you sympathize and angry almost because at some point in our history this happened, and it forces you to think if this was to happen again, would we survive? By 1937, gross national product had returned to pre-crash levels, and unemployment had fallen to 14 percent. One of the most surprising things I learned from Cohen's book is that FDR was very much opposed to Federal Deposit Insurance, now one of the least controversial New Deal programs, and threatened to veto it. Worst case scenario: This was a covert way of him selling and getting me to read a biography of Frances Perkins.
