## the Statesman: the Unity of Plato's by Ryan Middleton

The Sophist and the first part of the Statesman represent the search by means of an elaborate tree-like system of roads. Can the many attain to science? When Socrates was publically executed in 399 B. We do not find perfect consistency in his philosophy; and still less have we any right to demand this of him in his use of mythology and figures of speech.

## Statesman. Philebus. Ion — Plato

Set on the right track, they readily complete the rest of the division. STRANGER: Then let us divide sciences in general into those which are practical and those which are purely intellectual. The sophist and the statesman rank among great and difficult things Sophist 218c—d, Statesman 278e; cf.

## Statesman on Apple Books

YOUNG SOCRATES: Cannot we have both ways? Once more we will endeavour to view this royal science by the light of our example. Reading the Statesman, Sankt Augustin: Academia Verlag.

## Plato's Statesman a Translation of the 'politicus' of Plato by Skemp J B

Abstract Plato's Statesman comprises three parts: method, myth, and politics. All divisions which are rightly made should cut through the middle; if you attend to this rule, you will be more likely to arrive at classes.

## PLATO, The Statesman

I enjoyed this volume more than the last, on par with the first and third volumes. Having set off down the theoretical branch of knowledge in search for the statesman, the Stranger divides theoretical knowledge into two sub-kinds.

## The Internet Classics Archive

The science which makes the laws, is higher than that which only administers them. One might say that the property F-ness exhausts what F-ness is in its own right.

### **POLITICUS (Statesman) by Plato**

The unfinished Critias treats of lost Atlantis. He is the wholesale dealer in command, and the herald, or other officer, retails his commands to others.

### **Statesman (dialogue)**

Some scholars think that Plato needs a second notion of negation in addition to difference understood as distinctness or non-identity, such as incompatibility, to accommodate negative predication. And do you agree that we ought to divide the collective rearing of herds into two corresponding parts, the one the rearing of water, and the other the rearing of land herds? STRANGER: That we shall some day require this notion of a mean with a view to the demonstration of absolute truth; meanwhile, the argument that the very existence of the arts must be held to depend on the possibility of measuring more or less, not only with one another, but also with a view to the attainment of the mean, seems to afford a grand support and satisfactory proof of the doctrine which we are maintaining; for if there are arts, there is a standard of measure, and if there is a standard of measure, there are arts; but if either is wanting, there is neither.
