## **Forensic Electrical Engineering**

Originally broadcast on TLC, narrated by Peter Thomas, and produced by Medstar Television, distributed by FilmRise, in association with truTV Original Productions. Our electrical engineers possess the expertise and experience as well as the testing facilities and labs needed to reveal the cause of failure and demonstrate for all parties just what happened and oftentimes why.

## **Forensic Electrical Engineer**

Electrical systems include power distribution, lighting, life safety, and control systems for buildings, as well as utility transmission and distribution systems. These defects can be further divided into various classifications of failure depending on the severity of their outcome. This includes studying the age of fractures, how they were caused, and the nature and direction of the fracture growth.
