Guide to watching Wildlife in the Canadian Rockies

Beavers are known to form wooden dikes in rivers and streams, so in some areas of Canada, they have unfortunately been hunted down to near extinction because they changed river flows, damaging the activities of humans. The Bow glacier melt water feeds Bow Lake and through a series of waterways this same water travels an incredible distance across several provinces to Hudson Bay. Lake Louise is both the name of a town and the most popular lake in the Canadian Rockies.

Colour in the Canadian Rockies,

There are plenty of hiking trails along the road; my favorites are Bow Glacier Falls, Glacier Lake, Wilcox Pass and Valley of the Five Lakes. Follow me: , , , Oh hello, glad to see you here! By April those areas are usually enjoying warmer temperatures and all the beauty of springtime flowers. Do I need a passport? There were almost no tourists in June, but lots of beautiful alpine flowers, shy marmots, white mountain goats and even one female grizzly bear.

The Canadian Rockies Colourguide

The only other way to access the area is by parking at the lot near the highway and walking in along the 11 km gravel fire access road. Especially if you want to do hiking and exploring on your own. The lake has a very short summer season and can often be frozen until mid-June or later.
