## **Child poverty levels for every neighbourhood in Bristol, South Gloucestershire and North Somerset revealed**

This seems to really muddle the various factors. Tackling child poverty is a priority both locally and nationally. All three independent administrative datasets yield the same conclusion about the prevalence of severe and multiple disadvantage by local authority area.

## **More than one in three children are living in poverty in parts of Gloucestershire**

New statistics show the amount of children across the county living in poverty Gloucestershire Bundles is a charity that looks to help families that find themselves in crisis. A majority of SMD adults and 59 per cent of the most complex group in the treatment database were parents of children, whether living with them or not, or had other child contact e.

## **GLOUCESTERSHIRE BUNDLES**

The impact on the NHS is severe, and cold homes lead to Excess Winter Deaths, especially among the most vulnerable in society.

## **Child Poverty**

Children in poverty will be among the worst affected by the crisis as households see their income hit further, through loss of employment and the increased costs of staying home — such as food, fuel bills and supporting home schooling. In some cases the figures are higher. The current performance for KS4 all pupils places South Gloucestershire in the bottom quartile nationally.

## **Child Poverty**

But while a was approved, residents face a delay in knowing exactly how much their bills will be. The background data on education is also extremely interesting. More worryingly, Bristol is the city with the highest levels of child poverty in the South West at 27.

## **Structure rather than behaviour: on the causes of poverty**

About the Author is Professor at the Institute for Social Policy, Housing, Environment and Real Estate, Heriot-Watt University While these articles look great they are often futile. We often run out of items for 13 to 14 year old boys.

### **Kenny Lynch**

But, with their complex needs and problems, this group generate quite high levels of financial and social costs on society, while themselves experiencing very poor outcomes and quality of life. Rates are highest in Patchway and Kings Chase with one in five children living in poverty.

### **Structure rather than behaviour: on the causes of poverty**

Two-thirds of adults claiming job seekers allowance live outside the priority neighbourhoods. Thus, it is quite wrong to portray this as a major, dominant cause of poverty. Adults in South Gloucestershire are generally healthy and have better health than adults nationally 10.
