For more on a comparison of the types of spending covered in the MEPS and spending covered in the NHEA, which is used in other figures in this document, see Bernard et al.

Health Care Economics: The Real Source of Reimbursement Problems

In I focused on the health care issues that impacted family medicine and our health care system during the past decade. But what is so powerful about this is that on an individual, day-to-day basis, each of us is making these calculations for ourselves based on our preferences and how we feel instead of slopes and equations. A fishery, like antibiotic effectiveness, is a common property resource.

Fact 3: Most health-care spending is on hospitals and professional services. ¹A complicating factor omitted from the discussion is time.

Applying Economic Principles to Health Care

This is a technical relationship that does not yet include dollars. We need new strategies to improve patient-clinician communication and to help our aging population stay healthy.

Health Care Economics

This year's news cycle will be consumed by politics, and the politics of health care will be front and center for the next 300 days. One reason for this is that health misfortunes can strike at random, causing one-year expenditures to spike.
