Advances in database technology

The success of the 1988 and 1990 conferences held in Venice suggested that there is room for a major international database conference in Europe every two years, to serve as a forum for presentation of new results in research, development and applications extending the state of the art in database technology.

SKC

These are the proceedings of the third International conference on Extending Database Technology EDBT held in Vienna in March 1992. Please note: Providing information about references and citations is only possible thanks to the open metadata APIs provided by and. We explore the extreme case where each measurement is quantized to just one bit, representing its sign.
