OCLC Classify

OCLC numbers vary in length.

OCLC Classify

ISSN An ISSN is a standardized international code which allows the identification of a serial publication. Hyphens or spaces usually separate the elements of the number on the item. ISBN An ISBN is a unique number assigned to an item by its publisher.

OCLC Classify

The classification numbers applied to books and other materials are used to arrange items on shelves and to support browsing, filtering and retrieval of bibliographic information in online systems. The database is searchable by many of the standard numbers associated with books, magazines, journals, and music and video recordings. Your local library may be able to help you gain access to a resource found through Classify and WorldCat.

OCLC Classify

An ISSN consists of eight digits in two groups of four, separated by a hyphen.

OCLC Classify

The UPC appears as a barcode symbol with 12 digits printed below it. Classification schemes are used to provide a systematic arrangement of materials.

OCLC Classify

Enter an OCLC number without leading zeros. FAST headings provide additional subject information about a work and enable you to search the Classify database by subject.

OCLC Classify

OCLC does not sell books and the actual content is not provided in our database. Classify provides a user interface and a machine service for assigning classification numbers and subject headings. Enter ISBNs with or without hyphens.
