Heat steel to a dark red and dip in mixture for y 2 a minute.

**Nova Scotia Archives**

Barachois Colliery opens at Sydney Mines small colliery; closed 1886.

**Khundii Gold District**

Search within the Tincup District. Unstratified drift of same nature as b.

**Gold District Neighborhood South End Charlotte**

Kimberly Colliery opens at River Hebert small colliery; operated one year only. Back of Mus- quodoboit Harbor and Jeddo e is the central part of

the THE GOLD FIELDS OF NOVA SCOTIA 45 Mooseland-Waverley granite tract with three anticlines and one syncline pitching toward it. This proves either that an old line of weakness had been re-opened, or that the fault has been formed when the granite was still molten and before it had cooled to such an extent as to prevent injection into newly form- 64 THE GOLD FIELDS OF NOVA SCOTIA ed faults.

### **Whiteburn Gold District**

As the age of a fault when known gives a clue to its probable effect on the gold bearing rocks, I shall refer to this phase of the subject later on. The major gold-producing district in the county is the Orient.
