IUSS Alert 191 (May 2021)

The ecological effects of diffuse air pollution from road transport. It must be published in an international peer-reviewed journal. The moss species were classified as obligatory epiphytes and facultative epiphytes according to Szövényi et al.

Comparative evaluation of mineral status of soils under waterlogging and non

Lichens as biomonitors of air quality. Simultaneous identification of plant stresses and diseases in arable crops using proximal optical sensing and self-organising maps.

Assessment of the Exposure and Loads of Acidifying and Eutrophying Pollutants and Ozone, as well as their Harmful Influence on the Vitality of the Trees and the Speulder Forest Ecosystem as a Whole, Water, Air, Soil Pollution

Kluwer Academic Publishers, Dordrecht, Netherlands. The results strongly suggest that CaF measurements of lichen transplants can be a valid tool in biomonitoring studies. The metal accumulation capacities by rhizinae and thallus without rhizinae as well as phycobiont and mycobiont without rhizinae were found to be interrelated and were dependent upon the biologically available metal conc.

Air pollution. Proceedings of the first European Congress on the Influence of Air Pollution on Plants and Animals, Wageningen, April 22 to 27, 1968. (Book, 1969) [localize-ing.justmote.me]

Diagnosis and Identification of Plant Pathogens: Proceedings 4th International Symposium of the European Foundation for Plant Pathology, Bonn,

9-12 September 1996. Ammonium uptake in the nitrophytic lichen *Xanthoria parietina* and its effects on vitality and balance between symbionts.
