### Books: 'Youth prolongation'

In the absence of vitamin B6, transsulfuration cannot proceed, and homocysteine begins to build up and damage blood vessels. No obvious damage to the cover, with the dust jacket if applicable included for hard covers. Amino acid defect causes 20% of atherosclerosis in CHD.

### Towards prolongation of the healthy life span : practical approaches to intervention

Additionally, men with the highest levels of homocysteine faced up to four times the risk of suffering a fatal heart attack as those with the lowest levels. The conversion of homocysteine to cysteine—known as transsulfuration—requires an enzyme called cystathionine b-synthase CBS along with vitamin B6 as a cofactor.
