Lyndon B. Johnson

Today's interventions are more drastic in scale and impact, and more threatening to life-support systems both locally and globally.

How is aid changing in the Covid

How glorious it is to contribute to this Land of Opportunity! Judging: Entries will be screened by a university partner and then judged by an expert panel. Along these same lines, I invite the international community to contribute with specific actions so that the parties involved may overcome the differences that at this stage keep negotiations in a wait-and-see state, so that they will succeed, first of all, in signing an agreement on Human Rights.

Understanding Poverty in America

In this understanding, all are born free; that is, they own their own minds and bodies.

Energy is another essential human need, one that cannot be universally met unless energy consumption patterns change. However, in spite of these openings, repression and violation of human rights persists in the middle of an economic crisis, that is becoming more and more acute, to the extent that 84% of the population is today considered as poor, and some 60% are considered as very poor. This would represent 20% of its population.
