Pond Plants

Flowering plants on sculptured rock face creates drama to this waterfall feature.

Backyard Pond

Pond Liner A pond begins with the liner, so we developed A pond begins with the liner, so we developed a lightweight liner that is ultra-durable and easier to handle. Virtually no experts recommend using an overlayment, even though you could easily damage the liner by stepping on one of the stones that ring your pond. Sourcing suitable clay for puddling If you are lucky and can wait, clay may be available cheaply as a waste product from local building sites and ground work or more likely and I'm afraid more expensive, from clay producers and most suppliers of aggregates.

Backyard Pond

Popular Posts 3 top garden privacy tips — how to make your garden look and feel more private! However, if autumn leaf fall is excessive rake or fish out some with a net before they sink to the bottom. Whether your pond is intended to support fish farming or koi, the septic system can affect the fish, killing them or infecting them with harmful bacteria. Also, the plastic will be wrinkly and look a mess but will sort itself out in the next step.

Is it okay to plant a garden over a leach field?

If you do need to use a pond liner, usually made of plastic or rubber, you should always add an underlayment to protect against punctures. At least

the wildlife can use it since they don't care about beauty. Privacy is a big issue for middle-sized gardens, because high hedges and fences block light.

Is it okay to plant a garden over a leach field?

A depth of 20-60cm 8in-2ft varied across the pond will suit the majority of pond flora and fauna.

500+ Pond Landscaping ideas

Water Celery on Feb 17, 2019 at 8:00pm PST When grown in unpolluted waters, can be safely eaten by humans. There were frogs in my pond just a few months after building it. Plus, its unique shape is great a sight for your pond.
