IBGE

Taking the Wheel challenges traditional accounts emphasizing state-led development in Brazil by crediting the role of small companies.

**planejamento econômico e social no brasil de 1930 1974**

This book demonstrates that there are important differences between how industry is thought to function and how it actually does—and that industrialization in Brazil is a constant process of negotiation among different kinds of firms and state officials.

Although small autoparts suppliers have seldom been credited with a role in its success, Caren Addis now reveals how they participated in setting up the industry and creating a Brazilian export behemoth. It tells how autoparts suppliers, working with state officials, were instrumental in shaping legislation, policies, and industrial practices from the 1950s to the present and how this alliance resulted in protectionist policies and legislation that helped form cooperative relationships between assembly operations and suppliers.
