Technological diffusion: European experience to 1850

Large numbers of logs were often assembled into rafts to aid their movement or into very large booms which drifted down river to mills and market. To overcome this problem logs were often placed side by side crosswise to cover ruts, puddles and mud holes.

Science and Technology of the Industrial Revolution Era

The technology and information on how to build a textile industry were largely provided by 1768—1835 who emigrated to New England in 1789.

Europe before 1914

The first commercial brewery in Canada was built in Quebec City in 1668 by Jean Talon. After 1905 Europe experienced a succession of diplomatic crises that heightened antagonism between the two blocs.

Industrial, economic and demographic changes, 1871

Without certain inventions from the Second Industrial Revolution, some of the ways we communicate today wouldn't be possible.

. In 1902, completed a trans-Pacific cable telegraph, linking with and.

Technological Determinism

Media Credits The audio, illustrations, photos, and videos are credited beneath the media asset, except for promotional images, which generally link to another page that contains the media credit. Although he made some effort to become acquainted with the contemporary people in order to

unlock many of the mysteries of the island Heyerdahl 1958:Introduction , most anthropologists seriously question the scientific validity of his speculations. Lawrence Railroad, Quebec, in 1836.

Industrial Revolution and Technology

A century later it was nearly 70 per cent.

The Industrial Revolution, Politics and Public Policy

Complete assimilation is not the inevitable consequence of acculturation due to the value systems of the minority or weaker culture being a part of the entire configuration of culture. Recognizing the success of in unifying that empire, political and business leaders in the United States began to construct roads and canals to connect the disparate parts of the nation. Wood ash was also used in the home by colonials to make soap.
