## Propagation and Interactions of Acoustic Waves in a Waveguide Attached at the Surface of Rock

SCImago Journal Rank is an indicator, which measures the scientific influence of journals. The booking process Since the symposium duration is a high season in Thailand, please make a reservation earlier to ensure the room availabilities.

## 4th Conference on Vibration Measurement, Together with 23rd TC3 Conference on the Measurement of Force, Mass and Torque and 13th TC5 Conference on the Measurement of Hardness

Force Mass Torque 13th TC5 Conf.

## Development of a Surface Flow Sensor for Measuring Turbulent Drag Force

The thermal mass flow sensor was operated by either constant current or constant resistance modes. At present, both types of experiments are used to determine the numerical value of the Planck constant. Topic: The effect of the redefinition of the kilogram on its present related quantities Abstract: The recent proposal to redefine the kilogram seems to leave unchanged the entire dissemination chain, including the realization of related

quantities such as strength, torque, pressure, and so on.

Please do not plan to use your own laptop for running your presentation to avoid problems with computer-projector compatibility and to save time that would otherwise be needed for changing connection. This definition has the advantage of great conceptual simplicity, but also presents some disadvantages and is no longer considered adequate in a time of ever increasing measurement accuracy. According to SCImago Journal Rank SJR , this conference and proceedings is ranked 0.

Subsequently the waveguide coupling conditions filled with epoxy were compared with a mechanical type of coupling for the validity of field application. It means 1 articles of this conference and proceedings have more than 1 number of citations. Due to the variety of applications in biological and material science technologies, microcantilevers have recently received widespread attention.

The SJR is a size-independent prestige indicator that ranks journals by their 'average prestige per article'. He is also, since 2000, a contract professor of the Polytechnic di Torino to the course of Experimental Statistics and Mechanical Measurements.
