## The Impact of Aging Populations

Annual Statistical Supplement to the Social Security Bulletin, 2005.

## Ageing

I think we have to worry a great deal about aging in America. The succeeding section uses the Modeling Income in the Near Term MINT model to assess the projected 1 changes in the marital status composition of the future retirement-age population; 2 demographics of future never-married retirees, and 3 economic well-being of never-married retirees. Accidental factors are those that only temporarily influence labor-force participation, such as natural disasters or wars.

## The Impact of Population Aging and Delayed Retirement on Workforce Productivity

These groups were not included in the main analyses because of space constraints, small sample sizes, and because heterogeneity in these groups could make drawing conclusions problematic. Today almost 500 million people are age 65 and over, accounting for 8 percent of the world's population. Iams, James Moore, and Mikki Waid.

## Aging & Socioeconomic Status

Demographics, innovation and medium-run economic performance We also develop a theoretical model to match the lifecycle characteristics observed empirically and to study the main mechanisms through which demographic changes affect the macroeconomy. Marriage, divorce, and remarriage, rev edition Cambridge, MA: Harvard University Press. Projected poverty rate of retirees aged 62 or older, by marital status, 2020—2060 in percent Marital status 2020 2030 2040 2050 2060 All 5.

Older workers: Labor force trends and career options : Career Outlook: U.S. Bureau of Labor Statistics

### **The Impact of Population Aging and Delayed Retirement on Workforce Productivity**

This range captures the variation across health outcomes, sex, and race, with the largest age gap found for black adults in SRH. Research has also found that married individuals live longer than unmarried persons and that never-married men have especially higher mortality rates Goldman, Korenman, and Weinstein 1995; Lillard and Waite 1995; Rogers, Hummer, and Nam 2000; Waite and Gallagher 2000. Even if employment and earnings patterns of older workers do not change during the next two decades, the share of all labor income received by older workers will continue to rise through about 2025.
