Feminist epistemology

Other Feminist social epistemologists offer different analyses of how to attain such partial connection.

This implicitly denies epistemic authority to women. Feminist epistemologists argue that practical interests properly shape the product of inquiry by introducing new dimensions of evaluation to theories. Along these lines, feminist epistemologists analyze the ways in which testimony operates epistemically while also being embedded in particular social relations that are often opaque to actors and reasoners.

A Feminist Epistemology

Feminists argue that this ideal is self-deceptive and unrealistic Potter 1993; Longino 1990, 2001; Harding 1991, 1998; Wylie 1996. The result, according to standpoint theorists such as Harding, will be knowledge that is less partial and distorted, and hence, more objective. Hermeneutics, Phenomenology, and Postmodernist Approaches The ways in which Continental philosophical approaches have shaped feminist epistemologies are both complicated and widespread, and even feminist epistemologists who are writing primarily in the Anglo-American tradition have often been influenced by the critical trends in Continental thought.

Reflexivity in fieldwork: toward a feminist epistemology

Capitalists, by contrast, represent the world ideologically in superficial exchange value and parochial class interested terms. The core claim of value-neutrality is impartiality. Society is structured primarily along the lines of two classes, the working class proletariat and the capitalists the bourgeoisie who own the means of production.

This history helps us see how feminist epistemology negotiates the tension between the two poles in the paradox of bias in feminist empiricism—viewing bias as error, and as resource. Feminist philosophers of science argue that we have an epistemic interest in ensuring that certain limiting biases do not dominate research to the exclusion of other generative biases that yield rival theories possessing a different range of important empirical successes.
