## Cartography

Anaximander was the first of the ancient Greeks to draw a map of the known world, and, as such, he is considered to be one of the first cartographers. This was a critical mistake that strengthened the idea that Columbus could reach Asia by traveling westward and actually led him to underestimate the distance to Asia as he set out across the Atlantic on his first voyage.

## The History of Cartography

Because sensors can detect and log huge quantities of accurate data regularly, they are often used in change detection projects.

## Computational Approaches to the History of Cartography

Want an easy way to keep up with the journal literature for Cartography or GIS? This increase in exploration set up a domino effect in human society.

## The New Nature of Maps: Essays in the History of Cartography / Edition 1 by J. B. Harley

As a unique display of analysis and portrayal, this is an outstanding example of the need for cartography to combine intellect and graphics in solving map design problems. These are just a few of the stories of women in American cartography. The portolan chart, made at the end of the 13th century 1275—1300 , is the oldest surviving that is, not simply a map but a document showing accurate navigational directions.
