## Advance Exhibition Schedule

Designing and grouping are other of the higher excellences in which they are very defective. Their holds were cumbered with large quantities of shingle ballast which tended to clog the limber-holes of the bilge and rot the frames and floor timbers; while the stowage space amidships was further usurped by the cook-rooms, which were placed on the shingle, and which, by the heat radiated from their brick sides, did damage to the timbers and seams in their vicinity. When it is considered that all this distance was made in the night time and through a country full of hostile Indians, without a road to follow or a bridge to cross the streams, the feat appears too incredulous for belief were it not for the most indisputable evidence, easily attainable, which makes disbelief impossible.
