## 50 Years of Car Parking History

The benefits of offsite and precast construction The two case studies cited amply demonstrate the convenience, construction time reduction and cost savings provided by offsite construction.

### Car Park Construction

Heated structures are also possible, although their effectiveness can be questionable.

### Car park locations and charges

As for all construction clients, supermarket chains are concerned about reducing initial build cost, but as owner occupiers, they also take into account the long-term impact of investment decisions. Engineering — Mechanical and Electrical Car parks utilise impulse ventilation to expel carbon monoxide and other pollutants from deep-plan parking decks. PCE Ltd is able to offer complete design and build multi-storey structural frame solutions for car park projects using the latest BIM technology and offsite manufacture processes.

### Multi Story Car Parks with Precast Prefabricated Elements

Such an additional layer of protection has the advantage that it can be regularly inspected and remedial work undertaken if required. Braced structure Suitable bays or cores are placed around the building to provide stability in two orthogonal directions.
