**Nonfiction Book Review: The Male Biological Clock: The Startling News about Aging, Sexuality, and Fertility in Men by Harry Fisch, Author, Stephen Braun, With Free Press \$24 (192p) ISBN 978**

But not to worry: He has all the time in the world, right? Whereas fertility declines along with testosterone levels as men age, it doesn't drop to zero. Stories of people such as Saul Bellow, who became a father at age eighty-five, and Tony Randall, a father at seventy-two, help sustain a widespread myth: women have a gun to their heads that men never have to face. They almost always do -- and the emotional knots that can arise from a mechanical breakdown can sometimes be tougher to solve than the breakdown itself! Although the size of a man's penis has little to do with either sexuality or fertility, the size of his testicles does.

## The Male Biological Clock on Apple Books

I could not leave it out of my sight once I started reading it. The good news: Much can be done to slow down and even reverse the effects of a man's biological clock. In my daily practice I see much needless suffering caused by a lack of understanding, inaccurate information presented in the media, and misleading claims by fertility clinics.

Studies assessing sperm deficiencies and the reduction in male factor fertility are numerous. Fisch tells the story of the overlooked partner in 'baby making' and sexuality -- the man.

## Fact or Fiction: Men Have a Biological Clock

The incidence of genetic problems in their sperm increases with age, which leads to many problems, including Down syndrome. We have all heard stories of men becoming fathers in their seventies or even eighties, yet most of us are unaware that these are dangerously deceptive exceptions. MCRM Fertility offers on site DNA Fragmentation testing.

Each one of those divisions is an opportunity for something to go wrong. His work has been frequently cited in a variety of publications, including The New York Times and The Economist, and he has appeared on television's Today and CBS Evening News, among many others. In fact, every year roughly 5,000 men with vasectomies change their minds, and today, with the advent of microsurgical techniques, the success rate for vasectomy reversal in the hands of a competent surgeon is 85 to 97 percent.

At What Age Does Male Fertility Decline? He is director of the Male Reproductive Center and directs urologic microsurgery in the Department of Urology at Columbia University Medical Center of New York Presbyterian Hospital in New York City. The biological clock, although just a metaphor, refers to a real phenomenon: Women over 35 years of age are only half as likely to become pregnant in the most than women younger than 26.
