### **9780849320293: Plant Tissue Culture Concepts and Laboratory Exercises**

Alternating between topic discussions and hands-on laboratory experiments that range from the in vitro flowering of roses to tissue culture of ferns, Plant Tissue Culture Concepts and Laboratory Exercises, Second Edition, addresses the most current principles and methods in plant tissue culture research. Provides new exercises demonstrating tobacco leaf infiltration to observe transient expression of proteins and subcellular location of the protein, and information on development of a customized protocol for protoplast isolation for other experimental systems Includes detailed drawings that complement both introductions and experiments Guides reader from lab setup to supplies, stock solution and media preparation, explant selection and disinfections, and experimental observations and measurement Provides the latest techniques and media information, including A.
