Unanticipated Money Growth and the Business Cycle Reconsidered on JSTOR

The role of unanticipated changes in money growth for aggregate fluctuations is reexamined using the methods of quantitative equilibrium business cycle theory. In addition to its books, the Press publishes a distinguished group of journals including Inks, the journal of the Comics Studies Society, American Periodicals, Victorians, North American Journal of Celtic Studies, and Narrative.

Economics of multiple

Some aspects of the statistical properties of these fluctuations, however, differ significantly from those describing U. The study first involves modeling the problem of managing a two-stand forest over a two-period time horizon with and without intensive timber management and then solving a three-stand forest for several case studies by numerical simulation. However, due to the numerous meanings of the concept, policy makers and practitioners are finding it difficult to implement this new direction.

Economics of multiple

The Ohio State University Press was established in 1957 and currently publishes 50-60 new books a year. Furthermore, the result suggest that forest policy tools, such as forest practices laws and forest land-use zoning, need to be flexible over time and space to promote and achieve efficient resource allocation. However, demands on Canada's forestlands are becoming increasingly more diverse and traditional timber harvesting practices are now being scrutinized with regard to their consistency with these new demands.

Economics of multiple

We specialize in literary and cultural studies, including comics, narrative theory, Victorian studies, and medieval studies American studies, rhetoric and communication, gender and sexuality studies, and race and ethnic studies including Black studies and Latinx studies.

cap regulation, incentives and quality:: The case of Brazilian telecommunications

The response by provincial and federal policy makers has been a movement towards the concept of multiple-use forest management. The final part of the paper is devoted to implementation paths for transport pricing policies. The core of the paper is related to the construction of synthetic relative efficiency scores for quality, which were obtained for Brazilian local telephony over the period 1998—2002.

Economics of multiple

However, demands on Canada's forestlands are becoming increasingly more diverse and traditional timber harvesting practices are now being scrutinized with regard to their consistency with these new demands.
