Surgeon General's Reports on Smoking and Tobacco Use

Decline in deaths from heart disease and stroke--United States, 1900-1999. State-specific prevalence of cigarette smoking among adults, and children's and adolescents' exposure to environmental tobacco smoke--United States, 1996.

Tobacco Control and the Reduction in Smoking

Terry, himself a longtime smoker, spoke at a press conference unveiling Report of the Advisory Committee of the Surgeon General of the Public Health Service. Moreover, while more than 20 percent of current smokers in 1964 predicted that they would definitely be smoking in 5 years, only about 7 percent of current smokers in 1986 so predicted.

Smoking and the Media: The Surgeon General's Report of 1964

Stop-smoking medications such as varenicline Chantix or bupropion Zyban can also help. Cigarette Advertising in the Media Despite being banned in some US states in the early 1900s, as celebrated in this 1905 cartoon, the health threats of smoking were generally ignored. Quitting in the first 3 to 4 months of pregnancy and abstaining throughout the remainder of pregnancy protect the fetus from the adverse effects of smoking on birthweight.

Surgeon General's Reports on Smoking and Tobacco Use

The impulse for an official report on smoking and health, however, came from an alliance of prominent private health organizations. Estimates from this analysis are substantially higher than those reported by Warner because we evaluated a much longer period of time, and the gap between actual smoking and the counterfactual scenarios has changed substantially.

Smoking and Health: Report of the Advisory Committee to the Surgeon General ...

However, if used in combination with cigarettes, these products may offset some of the potential benefits, especially as these young adults reach ages when smoking begins to claim its toll. Under pressure from the tobacco industry lobby, Congress diluted many of these regulatory efforts, while the Food and Drug Administration claimed that cigarettes were beyond its scope until 1996, when it became involved in the issue of cigarette sales to minors. The medical community fiercely debated how and why smoking caused cancer in some people but not others.
