Analysis of technical efficiency in maize production in Guji Zone: stochastic frontier model

J, Private and Public Investment in Canada 1926-1951.

Production Function: Meaning and Types

Indeed, optimizing sustainability credentials to minimize the impact on the health and well-being of the public and the planet will remain a priority, particularly as enhanced sustainability measures could also provide additional economic benefits by enabling agriculture professionals to focus their resources and efforts more effectively. As noted in Chapter I, Li applied the Solow model to Canadian agriculture for the period 1946-65.

Analysis of technical efficiency in maize production in Guji Zone: stochastic frontier model

For conceptual as well as practical reasons, labor productivity, that is, output per unit of labor input, has been the most commonly studied measure of productivity, since labor usually represents a major proportion of value added in production, labor input is relatively easy to measure, and changes in labor productivity are directly related to changes in real income per capita.

Production Function: Meaning and Types

The interpretations for the other variables were done as follows: Gender of the household head SEX This variable is found significant at 10% level of significance.

The Production Function

At the second level, each unit of variable input produces 1. This implies embodied technological change in material inputs at the annual rate of 3.5 per cent, and in machinery and implements at the negative annual rate of 1.
