### **Cause and Effect: Barriers to Creativity and Innovation**

When dealing with the design problem, designers often forget to consider the solution through the transformation function and all its agents. Fashion sketches are used primarily to represent the size and shape of silhouettes which describe the outline of a garment and in describing the relationship of design elements in 2D form. As a specific type of designer, textile designers have to blend technology-chemistry, fiber physics, knit, weave and spin-and aesthetics-color, composition, texture and form-to create textiles that meet customer requirements.
