Education, Student Work 1948 M. Poppe and Zenger 1998 Relationship between outsourcing and performance, depending on: specificity of resource difficulty of measurement magnitude of skill set economies of scale Empirical research. The greater the difficulty to measure the outcome of an activity is, the more dissatisfied the managers will be with the cost, quality and responsiveness of the activities performed in-house. Home Economics, Student Work 1964 M.

**A thesis submitted to the faculty of the graduate school of the university of colorado in partial fulfillment of the requirements for the degree of doctor of philosophy department of economics**

The strategic role of IT most associated with outsourcing decisions is the traditional rather than integral role.

**A thesis submitted to the faculty of the graduate school of the university of colorado in partial fulfillment of the requirements for the degree of doctor of philosophy department of economics**

The considerations regarding cost are not so important in the propensity to outsource as the difficulties associated with obtaining quality information outputs and the provision of a good service. Their findings suggested that relationship characteristics have a profound influence on outsourcing outcomes. Home Economics, Student Work 1962 M.
