## Hebrew Calendar of the Old Testament

But not all Jewish years have 12 months. We can set our watches by the sun — but a millennia ago, the sun bore a child — the calendar.

## Jewish religious year

In addition to telling him the times of sunrises and sunsets each day, it also told him the names of local inns, the postage rates in various locations, and even made predictions about the weather. While this is a subject that I have not delved into, there certainly seem to be more than a few verses in Scripture that indicate that there will be a literal temple one day.

## The Week

The lunar year is 12 months long, or approximately 354 days, 11 days shorter than the solar year of 365 or so. That brought the year to 365 days.

## The Hebrew Calendar: A marvel of ancient astronomy and math

A year on the Gregorian calendar runs 365 days. The farmers would dry their figs for winter, and a would make their grapes into raisins, syrup, and wine.

## YEHOVAH God's True Calendar

The actual length of individual moon cycles over time. The tonalpohualli contained only 260 days.

## The Jewish Calendar

But the Jews could not tolerate this since three of their feasts are related directly to the agricultural cycle.

## Jewish Festivals

They came to be known collectively as Tabernacles. But we are not to follow their works - as when they observe the wrong day - because they follow the erroneous Jewish calendar with all its man-devised postponements. In comparison with the timing of the , it is off by 1 day every 216 years.
