Disaster medicine

Throughout the article, where quotes from individuals are specifically attributed, it is because the quote was acquired from a public news source or government document. These changes include: 1 an increased level of engagement by the private i.

National Disaster Medical System

It would be advantageous to lower the expectations now placed on the federal government in this case, DoD with regards to transportation by large aircraft, and to increase the expectation that we will use a wide and innovative variety of means of transporting ill people to hospitals where care can be provided. A typical DMAT deployment consists of 35 professional staff plus additional support staff who are equipped and trained to operate independently for up to 72 hours in austere environments. Accessed on March 27, 2006.
