The characteristics, origins, and geodynamic settings of supergiant gold metallogenic provinces

Amor Also released as Geological Survey of Canada Open File 8179 Open File OF2013-2 By M. Geology and tectonic evolution of the Superior Province, Canada.

Microstructural analysis of a subhorizontal gold

Surface Geology of the giant Horne volcanic-hosted massive sulphide deposit, Rouyn-Noranda, Quebec. Nelligan Property Northwestern Québec 3. Speak the language of gold and you will be understood and welcomed in nearly every society around the globe.

The gold content of volcanogenic massive sulfide deposits

Due to their inherent rheological weakness, these suture zones are often concealed, which hinders surface-based observations. University Paris-Sud, Paris, 290 pp. Subduction-related thermal events, episodically raising geothermal gradients within the hydrated accretionary sequences, initiate and drive long-distance hydrothermal fluid migration.

Geological classification of Canadian gold deposits (2000 edition)

Volcanogenic massive sulphide deposits of the Paleoproterozoic Trans-Hudson Orogen and the Archean Abitibi Subprovince: Characteristics and metallogeny. Past MSc Students Jonathan Sutton Volcanic Stratigraphy and Hydrothermal Alteration of the ca.
