Research in Agriculture, Livestock and Fisheries

The scope of the journal is broad and encompassing, covering a range of research areas including, but not limited to all aspects of Agriculture, Livestock and Fisheries. ISSN Online : E-2409-9325 ISSN Print : P-2409-0603 Year of Launching : 2014, December Editor-in-Chief : Prof. Bangladesh is considered one of the most suitable regions for fisheries in the world, with the world's largest flooded wetland and the third largest aquatic biodiversity in Asia after China and India.

Research in Agriculture, Livestock and Fisheries

However, fisheries production is well below production targets despite the large gains seen in the aquaculture sector.

Bangladesh Fisheries Research Institute (BFRI)

It publishes high-quality original scientific papers, short communications, correspondence and case studies. From 2000 and 2016, aquaculture production increased from 712,640 and 2,060,408 metric t, a much larger quantity than wild capture production 1.

Research in Agriculture, Livestock and Fisheries

. Muzahed Uddin Ahmed Managing Editor : Dr.

Fisheries resources of Bangladesh: Present status and future direction

Only those manuscripts the contents of which have not been published and are not being considered for publication in any other journal are considered for publication. RALF also welcome papers related to Agricultural Economics and Extension, and Agricultural Technology. This increase in the aquaculture production has been made possible with the implementation of scientific and technological modernization.

Research in Agriculture, Livestock and Fisheries

It takes proper initiatives for planning, conduct, and coordination of fisheries research in Bangladesh. The Headquarters of Bangladesh Fisheries Research Institute is located in Mymensingh.
