Arizona State Museum

The roof of the kiva was built by cribbing, and, as the kiva is large, 8 instead of 6 pilasters were needed to support the roof.

Arizona State Museum

The ventilator shaft of this kiva is constructed in Kiva 2. .

Brian D Haley

Chapter 4 describes the investigation of a single site located at the western edge of the land exchange area near Helvetia. The location of towers by kivas seems particularly significant. Lower photographSection southeast of Unit Pueblo No.

Excavations on Black Mesa, 1982 : a descriptive report (Book, 1984) [localize-img.justmote.me]

Heavy blocks of sandstone were selected, roughly squared, and the inner and outer faces of the walls were then built of these stones. Some thick wads of knotted corn leaves, tied with yucca, show extensive wear as if they were used as general cleaning or scouring pads.
