Chapter 3

Questions 1 - 4

An elderly patient comes home for several hours most days of the week and attends a facility where care is provided specific to the needs of the elderly. The patient is attending which of the following types of community-based nursing care programs?

1. adult day care
2. healthcare clinic
3. urgent care center
4. outpatient center

Current Answer: 1

Retained 1: One type of community-based nursing setting is adult day care. The elderly patient who leaves to receive care that is specific to the needs of the elderly is attending an adult day care program.

Retained 2: A healthcare clinic is one that provides care to patients of different ages.

Retained 3: An urgent care center is a facility that provides care to patients of all ages who are experiencing an emergency or urgent medical problem.

Retained 4: An outpatient center is one that provides care to patients of all ages and for a variety of healthcare needs.

Global Retained: One type of community-based nursing setting is adult day care. The elderly patient who leaves to receive care that is specific to the needs of the elderly is attending an adult day care program. A healthcare clinic is one that provides care to patients of all ages who are experiencing an emergency or urgent medical problem. An urgent care center is one that provides care to patients of all ages who are experiencing a non-emergency health issue. An outpatient center is one that provides care to patients of all ages and for a variety of healthcare needs.

Cognitive Level: Analysis

Ch 3 Std: Health Promotion and Maintenance

Ch 3 Obj: Define health.

Nursing Interventions Concept: Nursing Process; Assessment

Learning Outcome: Differentiate community-based long-term healthcare from health care

Question 2:
Type: MCNA
