## The Necessity of Enforcing Humanitarian Law and Human Rights in the Context of Counterterrorism

Security Council resolutions on countering terrorism should exclude the activities of neutral, independent, and impartial humanitarian organizations from their scope, and to mitigate the harms of prior resolutions. Also, human rights scholarship tends to examine only a narrow set of human rights that are institutionalized in international human rights regimes predominantly civil and political rights.

The second generation is called red rights which foster equality between citizens. Compliance, Enforcement, and Effectiveness The creation and evolution of human rights as embodied in international human rights law and its associated institutions and mechanisms is a very significant feature of the legal and normative changes that international society has undergone since the end of World War II. The focus here is on the institutionalization of human rights globally through the United Nations system and the connections between the development over time of international human rights institutions on the one hand and their relative effectiveness in shaping human rights behavior on the other.

Moreover, such a move might undermine the indispensable role and work of the International Committee on the Red Cross. Instead it is set by the treaty-based agreements and customary practice longstanding in application of international human rights law IHRL and IHL, respectively, as affirmed by the U. The issue of human rights moved to the forefront of UN activities and since 1997 within the broader UN reform process the idea is for human rights to become operational the so-called mainstreaming of human rights throughout the UN organization Oestreich , with a High Commissioner for Human Rights serving as a focal point for UN action and information in the field of human rights van Boven.

Finally, a genuinely interdisciplinary approach to the study of human rights regimes calls for a dislocation of disciplinary boundaries between international and national law, IR and comparative politics on the one hand, and between law and politics on the other. Moreover, it often neglects the more regulative and coercive dimensions of norms by which interests and power shape their creation, implementation, and enforcement. A more systemic perspective explains that international humanitarian law represents a function of international human rights law; it includes general norms that apply to everyone at all time as well as specialized norms which apply to certain situations such as armed conflict between both state and military occupation i.
