### Principles of Public International Law

Enlightened self-interest makes those norms effective. The effect has consistently demonstrated that states reliably behave with international law most of the time. It also gives advisory opinions on legal questions referred to it from authorized UN organs and specialized agencies.

### International law through the cases, (Book, 1970) [localize-img.justmote.me]

Quite often, the reason for a member state's noncompliance with an agency norm is not willful disobedience; rather, it is a lack of technical capacity to comply. States attempt to manage the friction with ongoing compliance through the principle of *pacta sunt servanda* — the adherence to agreements.

### Enforcing International Law

Simmons illustrates that legal obligations are reflected in the *opinio juris sive necessitatis*, which is the principle of international law where states believe or accept that a practice exists and must be followed, thus adding to customary international law. A number of pacts were subsequently negotiated by various Middle Eastern empires.

### Dispute Settlement in International Law

Therefore, as international law and abiding by accepted norms are considered acceptable behaviour, states are likely to comply. The Committee is also made up of representatives from all UN Member States.
