An Igorot Journey: dissertations and theses on the philippine cordillera

The women use their hands to form the vessel, and do not use a wheel.

Rice farming and pottery production among the Kalinga: New ethnoarchaeological data from the Philippines

Bachelor's Thesis, Instituto Normal Superior de Shell, Ecuador. The data shed light on the Kalinga Ethnoarchaeological Project contains information about the exchange of pottery between different levels of rice farming households. Earthenware ceramics are used for storing water in earthenware jars, and also, are used for cooking food such as meat.

Ceramics, kinship, and space: A Kalinga example

The focus of Understanding Pottery Function is on how practicing archaeologists can infer function from their ceramic collection. Research in Economic Anthropology 16: pp179-226.

Kalinga social and material culture boundaries: Acase of spatial convergence.

Kalinga Ethnoarchaeological Project

Keeping your temper under control: Materials and the manufacture of Papuan pottery. Copyright © 2018 Digital Antiquity. When Longacre went

to see the area, the Kalinga convinced him to come back and study their pottery.

Graduate Alumni

Several other studies on the Kalinga ceramic industry and ethnoarchaeological projects just like the Kalinga Ethnoarchaeological Project continue throughout Southeast Asia and the rest of the world. The Pasil region is composed of 13 communities that are independent of each other, each containing anywhere from 30 to over 100 households including Dalupa, Dangtalan, and Guina-ang.

Graduate Alumni

This book is designed to answer these questions using case studies from the author and his colleagues for applying use-alteration analysis to infer actual pottery function.
