Doctrine of Signatures: An Introduction to Deepening Our Connection with the Healing Properties of Plants

Monarchs become toxic to predators by feeding on the poisonous white milkweed sap. Kidney beans provide many of the nutritional qualities that promote kidney health. The 16th century alchemist and philosopher, Paracelsus, introduced in his treatise the Doctrine of Signatures, the concept that the Creator has placed his seal on plants to indicate their medicinal uses.

Doctrine of signature: a source of homoeopathic materia medica

Each grape looks like a blood cell and all of the research today shows that grapes are also profound heart and blood vitalizing food. This particular vitamin is important for healthy bones, even the tiny ones in the ear that transmit sound to the brain. Our lungs are made up of branches of ever-smaller airways that finish up with tiny bunches of tissue called alveoli.

The Ancient of Suppressed By The Establishment

Walnut Walnut, a classic example for the doctrine of signatures Walnuts resemble the human brain. Everything you need to get on your mat. Its flower-bearing spadix Jack sits enclosed in a sinuous, petal-like spathe the pulpit.

The Signatures of Plants: Learning Nature's Alphabet

In turn, the flower is superceded by the seed or fruit, which carries the genetic foundation for another plant to grow. Talk about an excellent teacher and classroom! Their functions are simple, with a basic emphasis on sustenance and reproduction.
