

Determinants of host country spillovers from foreign direct investment

Centre for Economic Policy Research - Injecting demand through spillovers: Foreign direct investment, domestic socio

TABLE 1: Location decision of foreign direct investments to the host country.	
Type of FDI	Factors influencing location decisions
Natural resource-seeking FDI	Availability, cost and quality of resources; processing, marketing, infrastructural development and availability of joint venture partners
Market-seeking FDI	Size, growth of domestic and regional markets, cost of labour, infrastructural quality, institutional competence, agglomeration economies, services support and macroeconomic policies of the host country
Efficiency-seeking FDI	Production costs, skilled and professional labour, industrial competitiveness, quality of infrastructure and institutions, sound macroeconomic policies, knowledge and innovation development and cluster specialisation
Strategic asset-seeking FDI	Availability of knowledge-related assets (technology and management expertise); markets and geographical dispersion of such assets; price and availability of synergistic assets to foreign firms; and access to different cultures, institutions and systems
