Hospital eTool: Expert System

Hospital Implements New Minimum Necessary Policies for Telephone Messages Covered Entity: General Hospital Issue: Minimum Necessary; Confidential Communications A hospital employee did not observe minimum necessary requirements when she left a telephone message with the daughter of a patient that detailed both her medical condition and treatment plan. The following document can be used in briefing sessions for pharmacy team members.

handbook of pharmacy healthcare

For digitised copies of reports 1962-1994, please see the The University Librarian's year in review and a PDF version of the full report are available from 1995 to 2014. Physician Revise Faxing Procedures to Safeguard PHI Covered Entity: Health Care Provider Issue: Safeguards A doctor's office disclosed a patient's HIV status when the office mistakenly faxed medical records to the patient's place of employment instead of to the patient's new health care provider. The AHSNs are continuing to work with trusts to put in place referral systems until the end of March 2021, but the initial likelihood of pharmacies receiving DMS referrals will vary depending on the local situation.

Pharmacy

Private Practice Implements Safeguards for Waiting Rooms Covered Entity: Private Practice Issue: Safeguards; Impermissible Uses and Disclosures A staff member of a medical practice discussed HIV testing procedures with a patient in the waiting room, thereby disclosing PHI to several other individuals.

Archives of Pharmacy and Pharmaceutical Sciences

After submitting the manuscript, the services rendered by the management and technical personnel to handle and process the manuscript were marvelous. Research by the National Institute for Health Research shows that people over 65 are less likely to be readmitted to hospital if they are given help with their medication after discharge.
