## Urban Water Supply

Carter RC, Parker A 2009 Climate change, population trends and groundwater in Africa.

## Sustainability in Water Supply

Still, more than 150 million people in South Asia alone have either no immediate access to clean water or drink from polluted sources. Although drinking-water and sanitation facilities lack the glamour of larger, more visible projects, the public health problems caused by the lack of these facilities stifle economic and social progress. The event affected tens of thousands of people in both Kinshasa and Brazzaville, and caused serious disruption of drinking water supply.

## Global Water Crisis: Water Shortage & Water Scarcity Solutions

Clearly, therefore, a low GDP is a major challenge facing efforts to improve water supplies.

## Developing Countries, Issues in

Compared to the SONEDE investments in the water sector, investment in the sanitation sector remains higher.

## 10 Clean Water Solutions For Developing Countries

Agriculture is also responsible for some of the surface and groundwater degradation because of run-off chemical and erosion-based. Risk assessment and management for water-related infectious disease.

## Developing Countries, Issues in

In poor countries, expensive water treatment is not affordable and there is little option but to drink increasingly contaminated water. All drinking water tariffs are subject to an 18% value added tax. Thus, poor countries with access to improved water experienced average annual growth of 3.
