Dream Interpretation In Jung's Theory A Comparative Analysis

For instance, in the classic representation of gestalt - a figure in which there are two profiles and one vase - consciousness can only apprehend one of the two figures at once; the unconscious would have the capacity of perceiving the whole gestalt.

Freud's Dream: A Complete Interdisciplinary Science of Mind

Some features have the detection to do. Formally trained as a psychoanalyst as well as a psychiatrist, he would eventually reject Freud's metapsychology and denounce it as a bundle of pseudoscientific inventions, especially his theory on dream interpretation and the foundational psychoanalytic concept, the unconscious.
