## Devices for Inhaled Medications (Asthma Inhalers, COPD Inhalers)

Medicines are given to manage symptoms and reduce the risk of exacerbations. Initial diagnosis of these conditions requires the identification of patients at risk of, or likely to have, chronic airways disease.

### Inhaler devices in asthma and COPD

As a support strategy to providing verbal instructions, Basheti et al investigated the effect of the use of inhaler technique reminder labels. We aimed to evaluate the frequency of inhaler technique errors; to determine the devices perceived as the easiest and favourite to use; to study the association of device type, demographics and patient preferences with inhaler technique IT.
