Abstract

The rapid transformation of the environment, which is characterized by increasing uncertainty, requires higher education institutions to constantly search for new ways to respond to it. This article presents a foresight exercise conducted at the Faculty of Engineering Management (FEM) in Wojciech University of Technology in Zielona Góra. It shows how foresight can help educational institutions to better understand the environment in which they operate and to develop strategies to effectively deal with it. The article also discusses the importance of foresight for the development of higher education institutions and the role of foresight in the process of achieving the objectives of research in the faculty.

Keywords: foresight; strategy; higher education institutions; scenario planning; engineering management

Higher Education Risks No Longer Being Worth It

Fiscal years generally start on July 1, and are named for the year that they end. Recall that discussed alcohol abuse on campus, a very significant higher education problem. Those reserves may allow states to fund their operations through some of the current fiscal year.

19 Higher Education Trends for 2021/2022: Latest Forecasts To Watch Out For

Realize that this crisis will require significant leadership time and attention and other efforts may need to go on hold for now.

How will higher education change post

And since MicroMasters programs are offered by the top universities, the programs are recognized by some of the top companies in the world.

How will higher education change post

These numbers confirm an increase in the number of CBE programs offered in colleges and universities. States are now in the 2021 fiscal year, which runs from July 1, 2020, through the end of June 2021. This led to institutions using more diverse course content delivery methods.
