Cardiac rehabilitation services in England and Wales: a national survey

In total, 199 81% of the centres claimed to provide a cardiac rehabilitation service. Most 22 88% programmes were hospital out-patient based, one 4% was hospital in-patient based, one 4% was community-based and one 4% was home-based.

Cardiac rehabilitation in England: a detailed national survey

How to participate Further details about the NACR can be found on the. Surveys of cardiac rehabilitation programmes were conducted to determine UK provision, uptake and audit activity, and to identify local interventions to improve uptake.

Depending on staffing configuration an approximate 200-790% budget increase would be required to provide cardiac rehabilitation to all potentially eligible patients.

Cardiac rehabilitation in England: a detailed national survey

The central components of all programmes were education and exercise training but there was a wide range in the quantity and quality of service provision.
