## People of the great ocean : aspects of human biology of the early Pacific

A field study of thermal stress in New Guinea villagers. There may not be any simple and, therefore, from an anthropological point of view, practical way of detecting periodontal disease in other than its severe forms where there will be marked and often irregular loss of alveolar bone visible to the naked eye. Demonstration of this ultimately rests with the extraction from human faeces coprolites found in archaeological sites of the characteristic egg cysts of the creatures; but the tropical Pacific environment is unfavourable for coprolite preservation.

## Great Pacific Garbage Patch

A prospective study of Maori infant health and the problem of nutritional anaemia. Such uplift is obvious on the coasts of many islands.

## People of the Great Ocean by Philip Houghton

As early as 2010, Tara Expeditions Foundation was one of the first bodies to undertake a scientific examination of microplastic pollution in the oceans, an issue previously subject to very limited scientific study. In two periods, separated by a global cold period between 1000 BC and 400 BC, they followed these currents west to Madagascar and east Africa, north to Japan, Hawaii and America and south to New Zealand. Relatively is a useful word here.

## The human skeletal material from the Waihōra site, Chatham Islands / Philip Houghton

The Biological Remains Part II , by G.

## Introduction

If florid and of long standing this may develop all the classical changes of cloacae, involucrum and sequestrum. Cook 1967: 170-171 Later medical workers gave vivid descriptions of the ravages of the disease: At Boera I got my first real look at a yaws-stricken community. Copenhagen: National Museum of Denmark.

## **Great Pacific Garbage Patch**

The warm, stormy waters of the North Atlantic once supported great populations of cod and sperm whale.
